Openholdem 排行榜策略说明

Openholdem Leaderboard Strategy Description

由于德扑的强随机性和不确定性，只有对抗场次累计到一定数量的用户才会开始参与排名，排名主要依据以下几个指标：

Due to the strong randomness and uncertainty of Texas Poker, only a certain number of users who have accumulated a certain number of confrontations will start to participate in the leaderboard. The leaderboard is mainly based on the following indicators:

1、**场均收益筹码数**：用户在所有对抗场次中累计总收益/该用户总对抗场次数；

Average win chips: total chips of the user in all confrontation Games / total number of confrontation games of the user.

2、**总胜场数**：用户在所有对抗场次中累计胜利场次数；

Total number of wins: total number of wins of users in all confrontation games.

3、**总负场数**：用户在所有对抗场次中累计失败场次数；

Total number of lose: total number of loss of users in all confrontation games.

4、**胜率**：用户在所有对抗场次中累计胜利场次数/该用户总对抗场次数。

Winning rate: total number of wins of users in all confrontation games / total number of confrontation games of the user.

段位划分说明：段位划分依据场均收益筹码进行划分，

Description of rank division: rank division is based on average win chips,

➢ 专业高级：场均收益筹码>=400；

Professional senior: average win chips > = 400

➢ 专业中级：400>=场均收益筹码>300；

Professional intermediate: 400 > = average win chips > 300

> 专业初级：300>=场均收益筹码>200；

Professional junior: 300 > = average win chips > 200

> 业余高级：200>=场均收益筹码>100；

Amateur senior: 200 > = average win chips > 100

> 业余中级：100>=场均收益筹码>-100；

Amateur intermediate: 100 > = average win chips > - 100

> 业余初级：场均收益筹码<=-100。

Amateur junior: average win chips < = - 100.

排行榜有**总排行**、**日排名**、**月排名**、**年度排名**四种。

There are four kinds of leaderboard: **total** ranking, **daily** ranking, **monthly** ranking and **annual** ranking.

> 总排行展示平台自对外开放起所有累计成绩用户排名；

The total ranking displays all accumulated users since the platform went live.

> 日排名展示所在自然日的所有累计成绩用户排名；

Daily ranking shows the ranking of all accumulated users on the natural day.

> 月排名展示所在自然月的所有累计成绩用户排名；

Monthly ranking shows all the cumulative results of the natural month.

> 年度排名展示所在自然年的所有累计成绩用户排名。

Annual ranking shows all the cumulative results of the natural year.

由于平台内置多个基准 AI，策略不尽相同，为更客观的评估排名，平台提供**相对能力排行榜**，即以某一个 AI 为基准，列出所有与之对抗的用户排名，同样可依据上述 4 个指标进行排列。

Due to the built-in multiple benchmark AI, the platform has different strategies. In order to evaluate the leaderboard more objectively, the platform provides a **relative leaderboard**. That is to say, the ranking of all users against an AI can be listed based on the above four indicators.

> 对于二人德扑，平台提供坦率型 Bot、紧凶型 Bot 和自动化所 Bot_v2 三个基准对照 AI；

For two-person Texas Poker, the platform provides 坦率型 Bot, 紧凶型 Bot and 自动化所 Bot_v2 three benchmark AI.

> 对于六人德扑，平台提供自动化所 6 人 Bot 和随机型 Bot 两个基准对照 AI。

For six-person Texas Poker, the platform provides 自动化所 6 人 Bot and 随机型 Bot two benchmark AI.

每个排行榜都有**对抗规模、对抗模式**和**选手类型三组筛选条件**。

Each leaderboard has three groups of screening conditions: **confrontation scale**, **confrontation mode** and **user type**.

> 对抗规模可以选择二人或者六人，会分别进行二人场对抗和六人场对抗的成绩计算与排名；

For confrontation scale, you can choose Duet field or Field of six, the platform will calculate the scores of the two and rank them.

> 对抗模式有人人对抗、人机对抗、机机对抗三种，其中人人对抗不存在相对能力排行榜；

For confrontation mode, you can choose human vs human, human vs ai, and ai vs ai, the platform will calculate the scores of the three and rank them, among which there is no relative leaderboard for human vs human confrontation.

> 选手类型可以选择 AI 或者人类，根据用户类型不同分别进行展示。

For user type, you can choose AI or human, and display them according to different user types.
